## **"EU-WISE workshop-Spain"**

### **Summary**

EU-WISE is a FP7 project ([www.eu-wise.com](http://www.eu-wise.com)), that started in 2012, involving seven countries and eight institutions from United Kingdom, Netherlands, Bulgaria, Greece, Norway, Ireland and Spain.

One of the aims of EU-WISE is to disseminate results at the European institutions through different strategies: publications, congresses, web-page, etc. The project will end in December of 2015 and, for the last four months of the year, some Regional Workshops have been planned with this purpose.

Through this meeting at Murcia (Spain), with the collaboration of the other Spanish partner, the University of Navarre, key stakeholders at the Murcia Health System and other parts of Spain, will be able to discuss the results of EU-WISE and share their experience and links with their own lines of research.

Potential future collaborations and dissemination of results will be explored between the institutions participants
