Antibiotic resistance:

A cultural
contexts
approach to
addressing
a global
health
challenge

12.02.19

13.00 - 14.00 GMT
14.00 - 15.00 CET

Antibiotic resistance (ABR) is a major threat to global health and well-being. This webinar will investigate the cultural factors that shape antibiotic use and help in understanding the transmission of ABR, such as the way culture shapes the protocols defining how ABR is researched and regulated.
